

New

# The new benchmark for adjustment systems in upholstered furniture ProFlex – modular system for configuration flexibility

ProFlex serves for adjustment of the arm- and headrest in upholstered furniture.

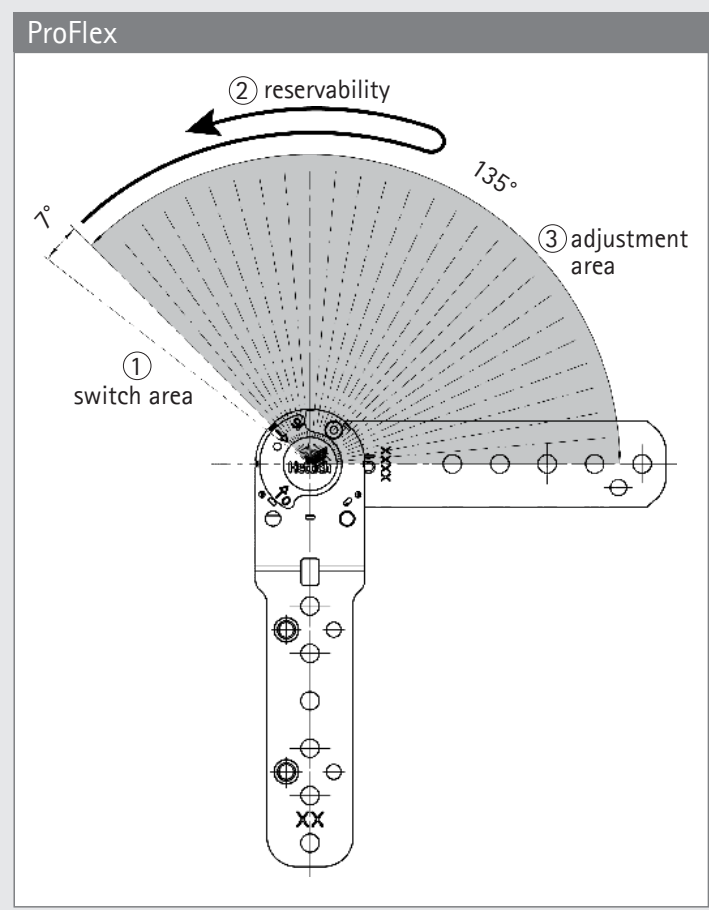

ProFlex is conceived as a modular system. This means that there are many possible applications without having to change the mounting dimension. Basically add-ons can be combined, i. e. Silent Mode, Easy Stop and spring, all variants are available in surfaces chrome and black.

- ① **Smallest point of return on the market with 7°**, this makes new designs possible
- ② **Reversibility** – the ProFlex can be switched from various positions. This ensures a comfortable adjustment and a reduction of variants
- ③ **Wide adjustment area up to 135°**, fine notches in 5° steps

ProFlex with arm

**Arm**  
Connection options customised to suit customer requirements.

| Name                          | Ref.No.        | PU |
|-------------------------------|----------------|----|
| ProFlex with arm A 90° - 180° | 1.46.300.09.05 | 25 |
| ProFlex with arm B 90° - 180° | 1.46.300.10.05 | 25 |

# ProFlex – the modular system

## ► Overview of variants

### ProFlex spring with arm

#### Spring

The spring prevents the fitting from adjusting unintentionally and keeps the fitting in the defined basic position.

| Name                                 | Ref.No.        | PU |
|--------------------------------------|----------------|----|
| ProFlex spring with arm A 90° - 180° | 1.46.300.07.05 | 25 |
| ProFlex spring with arm B 90° - 180° | 1.46.300.08.05 | 25 |

### ProFlex with flat link

#### Flat link

Link variants are an additional design element in the upholstered furniture due to their fine surface. The flat link serves for lateral fixing or alternatively for fixing with UniFix.

| Name                                 | Ref.No.        | PU |
|--------------------------------------|----------------|----|
| ProFlex SM with flat link A 0 - 105° | 1.46.300.15.73 | 25 |
| ProFlex SM with flat link B 0 - 105° | 1.46.300.16.73 | 25 |

### ProFlex with round link

Cover cap

#### Round link

Link variants are an additional design element in the upholstered furniture due to their fine surface. We recommend the use of a cover cap, alternatively a cover ring.

| Name                               | Ref.No.        | PU  |
|------------------------------------|----------------|-----|
| ProFlex with round link A 0° - 90° | 1.46.300.11.23 | 25  |
| ProFlex with round link B 0° - 90° | 1.46.300.12.23 | 25  |
| Cover cap chrome                   | 2.41.001.50.23 | 200 |

### ProFlex Easy Stop with round link

Cover ring

#### Easy Stop

A perceptible end position prevents the fitting from changing direction unintentionally. We recommend the use of a cover ring, alternatively a cover cap.

| Name                                  | Ref.No.        | PU  |
|---------------------------------------|----------------|-----|
| ProFlex ES with round link A 0 - 135° | 1.46.300.19.73 | 25  |
| ProFlex ES with round link B 0 - 135° | 1.46.300.20.73 | 25  |
| Cover ring black                      | 2.41.002.50.73 | 200 |

All variants are available in surfaces chrome and black as well as with function SilentMode. Further technical information is available upon request.
